Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 29-38, drawn to a method of staining slides, classified in class 435, subclass 40.5.
- II. Claims 39-40, drawn to a method of segregating waste, classified in class 435, subclass various.
- III. Claim 41, drawn to a method to add a new slide, classified in class 435, subclass various.

15 The inventions are distinct, each from the other because:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct because they are directed to entirely different methods with different functions.

25

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
